

Sustainable Growth Analysis

HOW A COUNTRY CAN ATTAIN
SUSTAINABLE GROWTH?

Sustainable Growth Analysis
Executive Summary

- 13 years data (i.e 2000-2012) was taken of the countries and the analysis was performed on the various factors like GDP/Capita ,business ,human resources, energy, tourism, .
- We observe a robust relationship between GDP per capita and healthcare expenditure per capita, indicating that **countries investing more in their healthcare sector tend to experience improvements in their GDP.**
- We have noticed that elevated lending interest rates exert an adverse influence on GDP, leading to **a decrease in economic growth.**
- To ensure long-lasting economic growth, it's a good idea to **lower business taxes and make it easier for people to start their own businesses.** This can have a positive effect on the GDP
- Promoting tourism and prioritizing the growth of urban and rural areas is essential for sustaining and improving GDP per capita in countries
- It was also seen that countries with higher GDP have more energy usage and CO2 emission.

Sustainable Growth Analysis Annexure

- **Higher the HealthExp/Capita,
Higher will be the GDP per capita.**

Health Exp/Capita vs. GDP/CAPITA

- **LOWER THE EASE OF BUSINESS,**

HIGHER WILL BE THE GDP PER CAPITA.

(NEGATIVELY CORRELATED)

Ease of Business vs. GDP/CAPITA

- **LOWER THE BUSINESS TAX RATES,**

HIGHER WILL BE THE GDP PER CAPITA.

(NEGATIVELY CORRELATED)

Business Tax Rate vs. GDP/CAPITA

- **Lower the lending interest,**

Higher will be the GDP per capita

Lending Interest vs. GDP/CAPITA

- **HIGHER THE TOURISM OUTBOUND/CAPITA,**

HIGHER WILL BE THE GDP PER CAPITA.

(POSITIVELY CORRELATED)

Tourism Outbound/Capita vs. GDP/CAPITA

- **HIGHER THE TOURISM INBOUND,**

HIGHER WILL BE THE GDP PER CAPITA.

(POSITIVELY CORRELATED)

Tourism Inbound vs. GDP/CAPITA

- **HIGHER THE GDP/CAPITA OF THE COUNTRY, MORE WILL BE THE ENERGY USAGE AND CO2 EMISSIONS**

energy usage/capita vs. GDP/CAPITA

co2 emissions per capita vs. GDP/CAPITA

- **HIGHER THE POPULATION URBAN,**

HIGHER WILL BE THE GDP PER CAPITA.

(POSITIVELY CORRELATED)

Population Urban vs. GDP/CAPITA
